CASHFAST

CashFast is a night pay hatch that is used to continue trading after hours or at times of high risk for the protection of staff.

It includes both a large bulk goods drawer and sliding cash tray with electronic speech transfer units to ensure good communication. Typically used in petrol forecourts, late night pharmacies, convenience stores and fast food restaurants.

MAIN FEATURES

- When not in use the bulk drawer locks in the closed position
- Full duplex electronic speech system ensures excellent communication from both sides
- Stand-alone installation which does not require mounting within the counterwork
- Standard 3 pin socket required for the speech transfer unit
- Insert with cash tray and large coffee cup holder

OPTIONAL

- Installation or supply only offered
