

DIMENSIONS (mm)

Bespoke to project requirement.

WEIGHT

Bespoke to project requirement.

RESISTANCE

Manual attack resistance:

BS EN 1627 RC4

Bullet resistance: EN 1522 FB6

Optional blast resistance available.

THERMAL REGULATIONS

GlassTek curtains walling offer a real barrier against thermal changes, fighting against the strong temperature variations between outside/inside on a site whether it is:

- **cold** (avoids heat losses during winter),
- **heat** (limits the need of reheating inside the building during the summer to limit the use of AC, reducing the consumption of energy in the building).

DATASHEET

GLASSTEK CURTAIN WALLING

GlassTek is a high performance range of curtain walling that has been designed to provide external protection against manual and ballistic attack at any establishment, whilst providing a barrier against thermal variances, therefore reducing a building's energy consumptions.

This solution is especially suited to sensitive, high-risk environments, including government buildings, headquarters, cash centres, police stations, prisons, and public and commercial buildings.

MAIN FEATURES

- Versatile, contemporary aesthetic to suit all corporate environments
- Tested and certified to withstand EN 1522 FB6 ballistic attacks and EN 1627 RC4 attacks
- Can be used in bespoke external walling applications
- A barrier against thermal variances
- Reduction of consumption of energy in the building
- Bespoke finishes and sizes available.

OPTIONAL

- Clear or reflective glass available
- Wide range of colours
- Optional blast protection
