SPEECH TRANSFER SYSTEMS

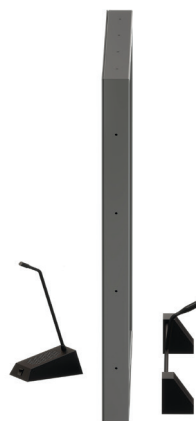

Speech transfer and window intercom systems provide hands-free electronic two way speech transfer between public and staff who are separated by security glazing. It is available from stock in four combinations.

MAIN FEATURES

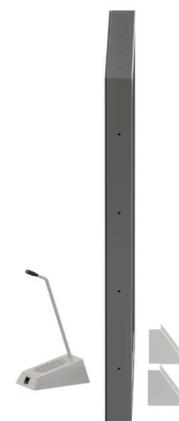

- Both staff and public are equipped with microphone and loudspeaker
- Staffside has a mute button to prevent staff speech from being transmitted
- Each system is supplied with its own power supply with a standard 3 pin plug, staff amplifier with volume adjustment, staff speaker microphone and an induction loop and sticker to accommodate hearing aid devices
- Both Safetell bridgebar and surface mount transfer systems are supplied with standard leads and connectors to provide plug-and-play systems
- Steel construction

OPTIONAL

- Can be retrofitted to existing counterwork or form part of new build projects
- Off-the-shelf kits are available on a supply only or supply and install
- Surface mount or Bridgebar systems are available in either black or grey
- Nationwide service available
